

**CANADA NICKEL**  
COMPANY

Located in Timmins Ontario, Canada Nickel Co. is focused on advancing its high-quality nickel-cobalt discovery. Their project aims to boost economic growth, provide employment opportunities, and align with responsible mining practices. They rely on industry-leading expertise and ESG best practices to minimize environmental impact. Canada Nickel Co. is committed to respecting cultural heritage, and the rights & traditions of Indigenous communities.

# CANADA NICKEL CO. & NETBENEFIT SOFTWARE CASE STUDY

## THE CHALLENGE

Canada Nickel Co. understands the need for accurate and efficient environmental, social, and governance (ESG) reporting, which is what regulators, communities, and investors expect. With a dedicated focus on local and Indigenous engagement, it's important for their team to quickly locate key information and export detailed reports.

As their project advanced, it became difficult to track communications and commitments made to stakeholders and rightsholders. With these challenges, Canada Nickel Co. began searching for an easy-to-use platform that met its reporting criteria. They had one key driving factor - a platform that keeps things simple.

## THE SOLUTION

Using the NetBenefit Platform, Canada Nickel Co. imported historical data and consolidated internal data sources. Working together, we configured platform functions to capture and link key data points. Automation empowers the Canada Nickel Co. team to reduce the time spent on completing administrative tasks, allowing them to focus on other areas of operations, such as relationship building and policy development. With constantly evolving reporting requirements, Canada Nickel Co. frequently utilizes configuration tools to adapt reports to various needs.

## PLATFORM BENEFITS

- 1 Empowers ESG reporting using stats and quantifiable metrics.
- 2 Allows users to adapt reports to meet multiple requirements. This includes federal, provincial, and other ESG requirements.
- 3 Provides an intuitive interface that enables users to get up and running quickly with minimal training.
- 4 Organizes data logically and removes the need to sift through inboxes, file folders, and spreadsheets.

## MODULE OVERVIEW

### ENGAGEMENT & RELATIONS

Automate logging and consolidate engagement for on demand reporting.

### AGREEMENTS & COMMITMENTS

Organize records and manage tasks to follow through and build trust.

**Alexandra  
Armstrong**

Community Relations,  
Canada Nickel Co.

"It was great to work with another young company that shares similar values. The team was flexible, helpful, and easy to get in touch with. It's been extremely helpful using a platform that is straightforward and able to adapt to various reporting requirements."
